ITEM # 815, CGA-590 INDUSTRIAL AIR CYLINDER TO CGA-580 NITROGEN REGULATOR ADAPTER

Adapters connect a regulator to a cylinder or other equipment when different CGA threads on the mating parts make a direct connection impossible.

Adapters must be selected with care to ensure that regulators and other equipment are used only with compatible gases and pressure ratings.

A mixture of non-compatible gases in any system is a possible hazard. Regulators and all other parts of an adapted system must be thoroughly purged of all contaminants, especially organic material and residual gases.
