

KOAMTAC

Charging Cradles for Pistol Grip and 1W UHF Reader

A Fast and Secure Method to Charge

1-Slot and 5-Slot Charging Cradles are perfect for small or large teams utilizing KOAMTAC Pistol Grip Companions or 1W UHF Readers for KDC® and SKX™ SmartSled® Scanners.

Convenient

Your Pistol Grip Companions or 1W UHF Readers sit securely in the cradle and charge via pogo pins resulting in less clutter from unnecessary wires. Just plug in the DC connector and you're ready to charge!

Simultaneous Charging

Both the 1-Slot and 5-Slot Charging Cradles feature additional charging slots for spare 6,000mAh batteries as well as 1100mAh KDC480/485 batteries. These slots simultaneously charge with your Pistol Grip or 1W UHF Reader.

Designed

KOAMTAC charging cradles are designed to best utilize limited counter or desk space, while providing powerful charging. Each charging cradle features integrated LED indicators to clearly display charging status.

Although the cradles look similar, KDC Pistol Grip Cradles and SKX Pistol Grip Cradles are not compatible with each other and only charge their respective SmartSled scanners.

Charging Cradle Details

LED Indicator

Green: Fully charged

Orange: Charging

Blinking Orange: Power is supplied to the cradle

Blinking Red: Charging issues
