AVer OPS Computer for the CP Series IFP
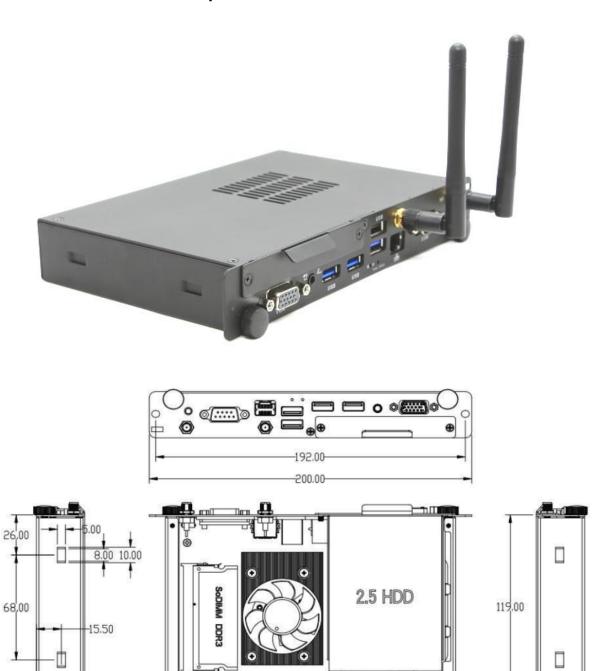

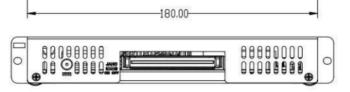

Powerful Cost-Effective OPS PC Module

You can purchase the CP series panel with the optional AVer OPS PC Module or upgrade in the future. This solution eliminates the need for an external PC, cabling, mounting and power supply. Featuring Intel's robust CPU architecture, this module has been optimized for reliable 1080p and 4K video playback and has the flexibility to run most third-party software and custom applications.

Features and Benefits

- **No external connections required.** PC signal, audio and control signals all passed internally from display to OPS device.
- **Seamless design** provides for clean, hidden integration that eliminates the need for external components.
- **Easy servicing** while the display is still mounted, simplifying installation and reducing maintenance.
- **Ultra HD (4K)** resolution
- **Strategic thermal design** for optimal heat dispersion

* Compatible with the CP654I, CP754I and CP864I
* Note although the Windows 10 64bit Pro OS is pre-installed, it isn't activated.   The license isn't included in the package.   Users are advised to use their existing license or corporate license to officially activate the system.
