Patented SLAPS Technology

**OBJECTIVE**

The MiniMe P8V2/P8WV2 amplifier utilizes the advanced class "D" circuitry with over 90% efficiency, allowing it to continuously perform without getting hot.

Earthquake's own patented SLAPS passive radiator technology dramatically increases the subwoofer's efficiency and capability for ultra low frequency reproduction. The unique design of the SLAPS employs dual (identical) suspensions, allowing the passive driver to move the same amount of air in either direction. Coupled with the active driver, the SLAPS enables the sub to deliver louder bass without using more power from the amplifier.

The deep luxurious black/White piano lacquer begins with a thorough sanding and priming, followed by multiple applications of black or white lacquer with additional fine sanding between each layer, and finished with a smooth, high gloss clear coat.
