

ROGUE PRO SERIES

Overview

The Rogue Wave Pro Series consists of the Rogue Wave Pro and Rogue Wave Pro DB. It requires a fixed vertical mount and is housed in a sealed and polished marinated stainless steel case developed in response to a need for an extremely marinated and rugged device for commercial, military and Homeland Security projects. The Rogue Wave Pro Series has an integral 1"-14 thread base that will fit most standard marine mounts. Power and connection are provided by a single 12V DC PoE cable for easy installation. While there is no software to be installed, the system comes with a user-friendly browser-based interface. With easy installation, the Rogue Wave Pro Series is a great cost friendly addition to any outdoor adventure!

Rogue Wave Pro DB

- Dual-Band WiFi 2.4 and 5GHz (5.1-5.8GHz) Omni-Directional Antenna
- Single cable 12V DC PoE (Power Over Ethernet)
- Easy install with standard 1'-14 threaded base
- 600Mhz Processor
- 802.11 b/g/n 2.4GHz | 802.11a/n 5GHz
- 10/100 Mbit/s Ethernet Port

Rogue Wave Pro

- Single-Band WiFi 2.4 only Omni-Directional Antenna
- Single cable 12V DC PoE (Power Over Ethernet)
- Easy install with standard 1'-14 threaded base
- 580Mhz Processor
- 802.11 b/g/n 2.4GHz
- 10/100 Mbit/s Ethernet Port

Availability of public wireless LAN access points may be limited. The transmission speed over the wireless LAN and the distance over which wireless LAN can reach may vary depending on surrounding electromagnetic environment, obstacles, access point design and configuration as well as client design and software/hardware configurations. The actual transmission speed will be lower than the theoretical maximum speed. Wireless connectivity and some features (i.e. VoIP) may require you to purchase additional software, external hardware or services.

*Actual distance may be affected by the strength and quality of the Hotspot signal, as well as having a clear line of sight to the boat. As we strive for constant product improvement, prices and specifications are subject to change without notice.

ROGUE PRO SERIES

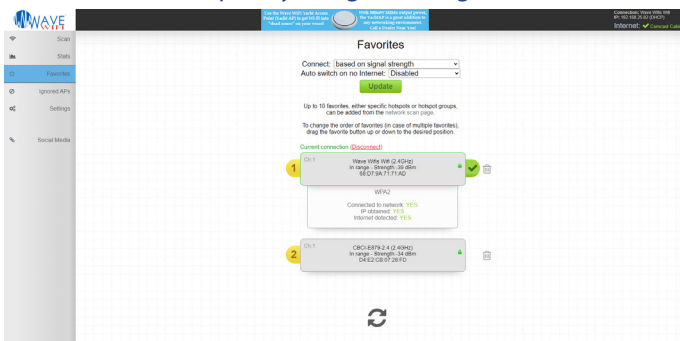

Wave WiFi products offer outstanding performance through the proprietary firmware technology embedded in each unit. The browser-based firmware permits the user to scan for hotspots and provides a detailed diagnostic of the quality of each hotspot. The Graphical User Interface allows the user to see the signal strength and quality in real time of any connected hotspot.

Our proprietary Graphic User Interface provides easy access to all functions and makes connecting a breeze.

Manage and sort through favorited Hotspots based on order of priority or signal strength.

Detachable Antenna

Stainless Steel Housing

5 Thread Base (Refer to Quick Start Guide)

Rogue Wave Pro (DB)
Freq: 2.4GHz / 5GHz
Size: 17in. H x 1.5in. W

Standard Mount (Not Included)
