WAVE WiFi®

CONNECTIVITY SOLUTIONS

YACHT AP DB

The Yacht AP DB integrates nicely with all Wave WiFi products and with most networking equipment. The Yacht AP DB can simultaneously broadcast on 2.4GHz and 5GHz Wi-Fi spectrums. Use the Yacht AP DB to increase the wireless coverage of your connection to your Boat or RV.

Gigabit Ethernet Port

2.4GHz + 5GHz

Broadcast simultaneously
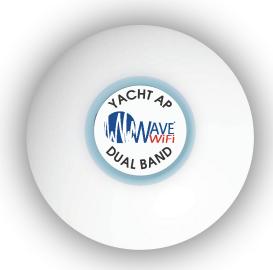

Up to 300Mbps (2.4GHz)

Up to 867Mbps (5GHz)

Sleek Design

24v PoE

Model	Yacht AP DB
Ethernet	One Gigabit Port
Wi-Fi	802.11 b/g/n/ac
Power	24v PoE provided
Speeds	300Mbps to 867Mbps
Diameter	6 Inches

Availability of public wireless LAN access points may be limited. The transmission speed over the wireless LAN and the distance over which wireless LAN can reach may vary depending on surrounding electromagnetic environment, obstacles, access point design and configuration as well as client design and software/hardware configurations. The actual transmission speed will be lower than the theoretical maximum speed. Wireless connectivity and some features (i.e. VoIP) may require you to purchase additional software, external hardware or services. ***Actual distance may be affected by the strength and quality of the Hotspot signal, as well as having a clear line of site to the boat. As we strive for constant product improvement, prices and specifications are subject to change without notice. *Operating range limited by Country Regulations.**
