MODULAR ACOUSTICAL ABSORBERS

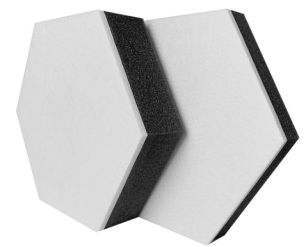

Auralex® Acoustics Synergy™ Hexagon™ Modular Acoustical Absorption Panels are comprised of an innovative combination of Auralex EcoTech™ and Auralex Studiofoam™.

The Synergy Hexagon Modular Acoustical Absorption Panels stand out as a versatile and effective solution for acoustic treatment in various settings, making them ideal for gaming, on-camera streaming, home offices, reaction channels, and more. With their unique hexagonal design, these panels offer endless arrangement options, allowing users to create visually striking and customized acoustic environments.

Beyond their aesthetic appeal, the panels are engineered to deliver maximum acoustic performance, effectively mitigating reverberation and unwanted background noise. This is particularly beneficial in spaces where clear audio is crucial, such as gaming setups, on-camera streaming studios, or home offices. The Synergy Hexagon Panels not only enhance the overall sound quality but also contribute to a visually appealing and immersive environment, making them a practical and stylish choice for content creators, gamers, and professionals alike.

Easy Installation

Equipped with an adhesive backing, these panels offer a hassle-free experience, allowing users to simply peel and stick them onto desired surfaces. This innovative feature not only streamlines the installation process but also eliminates the need for complex mounting hardware or professional assistance.

Simply peel the adhesive backing, press firmly to the wall (using even distribution of pressure), and hold for 35 seconds to allow the activation of the adhesive bond.

Endless Creative Possibilities

The **Synergy™ Hexagon™ Modular Acoustical Absorption Panels** redefine the possibilities of acoustic design with their innovative hexagonal shape and varying depths of 1.4" and 2.4".

This unique configuration not only serves as a functional solution for sound absorption but also opens up a world of endless arrangement possibilities. The hexagonal shape enables users to create captivating and intricate patterns on walls while the different depths provide an added layer of versatility. Whether arranging the panels in a honeycomb-like formation or utilizing gaps and negative space, the Synergy Hexagon Panels offer unparalleled freedom in customization.

This adaptability ensures that users can tailor their acoustic environment to meet both aesthetic and acoustic requirements, making these panels a standout choice for those seeking a harmonious blend of form and function in their space.
