

9900R

2-Pocket Mixed Denomination Money Counter, Reader and Sorter

► **Premium Bank-Grade:**

Superior functionality, accuracy and reliability. Counts the number of bills and identifies their denominations. Sorts money by value, design, face and orientation. Flawlessly handles mixed denominations and mixed currencies. Provides detailed report with printing capabilities. Innovative and advanced multi-sensor (UV, MG, IR, 2CIS) counterfeit detection records the serial number of each bill and detects half, chain and double bills.

► **Professional and Powerful:**

A 2-Pocket unit with strong counterfeit detection and a high level of efficient performance has an adjustable speed of 800, 1000, and 1200 bills per minute to allow the unit to adapt to the conditions of the bills. It has a thoroughly designed and convenient control panel with touch screen UI, and an easy-to-navigate user interface to utilize various counting modes (Mix, Sort, Count, Face, Orient, VBatch, DSort) and functions (Batch, Add, Add+Batch, Mix Currency, Auto Currency, Auto/Manual Start).

► **USA-Based and Built for North America:**

Designed specifically for American businesses by US-based professionals with 20 years plus experience in the cash handling equipment industry.
