

# GARMENTS

## Take your measures

The correspondence table below includes the measurements plus the ease required to practice one's trade.

Measurements are taken in centimetres, horizontally, using a tape measure, placed on the body without tightening it.

- HIGH CHEST SIZE - High chest size has to be taken at the strongest point of the chest.
- WAIST SIZE - Waist size has to be taken at the narrowest point of the bust.
- BELT SIZE - Belt size has to be taken from the lower waist/placed on the iliac bone.
- HIPS SIZE - Hips size has to be taken at the strongest point of the hips/ over the most curved area of the posterior

## Correspondence table

### Advice

It is advised to order the size corresponding to the largest of your measurements

It is recommended to choose your size according to your own measurements and not according to the equivalences in French size which remain indicative values.

In case of doubt, the use of a wardrobe is recommended.
