INTRODUCTION

ESCO U-Joint Pullers are specifically designed to assist in the removal of seized u-joint cups on vehicles. This tool was specifically engineered for technicians to eliminate harmful and potential dangerous removal processes like with vice-and-socket or hammer. Designed for use with a 1” impact gun, the ESCO U-Joint Pullers are manufactured from high-grade material, cast out of steel for both strength and durability. [Proprietary manufacturing and metal treatment processes ensure threads will hold up under even the most extreme conditions, commonly found in seized u-joints
