

# 10 Ton High Lift Jack Stand - Spring Assisted

Model #10493

Designed to provide extra heavy-duty support on raised vehicles. The High-Lift Jack Stand has a spring assisted shaft and up to 11 total adjustable pin positions for precise height. Also included is a adjustable lifting pad to support the load. With three spring loaded caster wheels, movability is simple and easy. The folding tripod design makes for easy storage.

- 1** Spring assisted main shaft for safe and easy positioning.
- 2** Foldable tripod stand designed for easy storage.
- 3** Easy to assemble with no tools needed.
- 4** Easy to maneuver through workshop

- ▶ A lifting capacity of up to 10 Tons (20,000 lbs.).
- ▶ Adjustable pin selections for precise height.
- ▶ Adjustable screw lifting pad for added height.
- ▶ Ideal for repairs on transmissions, engines, exhaust systems and more.
