

## F50 Polycarbonate Heat-Deflecting Face Shield Windows

These polycarbonate face shields provide premium impact protection from flying debris and chemical splash and feature special coatings that help dissipate heat.

### Key Features and Benefits:

- Metalized coating offers protection up to 2000°F while still allowing safe and clear views
- Anti-scratch treatment protects gold and aluminum coating and provides long service life
- Offers protection from impact, flying debris, and splash at extreme temperatures
- Extra-large window offers better wraparound protection for maximum safety
- Thicker polycarbonate (.075") blocks more heat than most other face shields
- Universal Pin Pattern Mounting System allows use with most brands of headgear
