

Run Your High-Speed Network at Peak Performance

High Quality Materials at Competitive Prices

Optical Fiber cables carry more information than conventional copper wire supporting higher bandwidth and faster speeds. Monoprice™ Fiber cables use Corning glass fibers, these are UL listed to ensure consistent quality and because, unlike copper, glass does not conduct electricity, are not subject to electromagnetic interference that can hamper network performance.

- Ideal solution for high-throughput network environments (telecom rooms, server farms, cloud storage network applications, etc.)
- OFNR Jacket Material
- Corning glass used for reliability complying with industry standards
- Industry standard OM4 color coding
- Factory terminated and tested for insertion loss, return loss, and end face
- Supports 100Gb up to 100 meters and 10Gb up to 400 meters

Fiber Optic Cables

Mode / Micron	Connector A	Connector B	Color	Length (m)	P/N
