

## All-in-One Android Video Collaboration Bar for Workspace and Huddle Rooms

Yealink MeetingBar A10, an all-in-one video collaboration bar for workspace and huddle rooms. Featuring 4K camera and 120° lens, A10 delivers outstanding video quality. Together with the electric lens cap, its AI technologies including Auto Framing, Speaker Tracking, and so on, allow users to experience a smarter and safer video conference. With 8 MEMS microphone arrays and Yealink AI based noise proof technology, A10 brings excellent audio experience in huddle rooms even in full-duplex mode and ensures that everyone can be heard. Moreover, A10 combines computing unit, camera, microphones, speaker, Wi-Fi, and Bluetooth, which provides you a solution of simple deployment. A10 supports for cloud video platforms like Microsoft Teams and Zoom, so no room PC is required. A10 is capable of content sharing and whiteboard that makes the meeting more communicative and collaborative. Simple and flexible deployment but powerful features deliver excellent video collaboration performance.

4K Camera

120° Wide FoV

Electric Privacy Shutter

AI Tracking

Noise Cancellation

All-in-One Design

## Key Features

### Smart Video Collaboration

Based on Android 11.0 OS, A10 owns native Teams or Zoom experience that all features can be operated by just one touch or by the remote controller. Also, you can experience a more communicative and collaborative meeting with the content sharing and whiteboard of A10.

### See Everyone Clearly

A10 has strong image processing, encoding and decoding capabilities. Besides, with a 4K camera, it can provide a high-quality video conference experience. With 120° field of view, everyone in the conference can be seen without adjusting the camera, while also ensuring no redundant surrounding environment included. Moreover, the image brightness can be automatically optimized even in a dim or backlight environment, ensuring the participant faces can be seen clearly.

### Smart Video Conferencing with AI Technology

Featuring AI technology, including Auto Framing and Speaker Tracking, A10 not only supports framing the groups automatically according to the number and the position of the participants, but also automatically zoom in the speaker without adjusting the camera, making the participants more focus on the conference.

### Precise Sound Localization, Full-Duplex Experience

8 MEMS microphone arrays make A10 have strong ability of noise proof and dereverberation. The new upgraded beamforming algorithm, together with technology of processing on acoustic echo cancellation and the dereverberation, brings high quality full-duplex call and realizes more precise voice pickup.

### All-in-One Design for Fast Start

Integrating computing unit, camera, microphones, speaker, Bluetooth, Wi-Fi and bracket, A10 takes up less space and minimizing cable clutter. Plugging in power and HDMI cable gets a video conference ready. In addition, the Yealink Device Management Platform ensures an easy management to you.

### Wireless Presentation with Low Latency

Cooperating A10 with Yealink wireless presentation pod WPP30, users can start a meeting anywhere in the conference room. WPP30 supports wireless presentation and wireless Device Mode, effectively integrating participants' opinions and improving meeting efficiency. With the Yealink algorithm, WPP30 can maintain a stable wireless connection even in complex network environments and delivers a super clear, speedy and stable presenting experience with low latency.

- All-in-One Design
- 4K Camera
- Electric Privacy Shutter
- Auto Framing and Speaker Tracking
- Built-in Bluetooth
- Built-in Wi-Fi
- Content Sharing
- Certified by Microsoft Teams & Zoom
